Sometown, CA 12345

Re: Senior Web Developer - Full Stack Software Engineer position

Dear Hiring Manager,

After reviewing the Senior Software Developer position and reading about CompanyName, I think we would be an excellent match. I have a track record of taking projects from start to finish, both single-handedly and collaboratively, and could do great things for you.

I have over 4 years experience as a Full-Stack Software developer with experience creating and maintaining high-traffic, responsive websites and Android applications. One example includes the California State Parks Webstore (<https://store.parks.ca.gov>).

I take great care to write code that is easy to extend and maintain, and try to help others to do the same. I'm a lifelong learner who enjoys teaching others, and have had the opportunity to guide both senior and junior developers through learning new technologies.

What really excites me is the opportunity to join CompanyName and make a real difference in the world. I'm very close to people whose lives has been turned around because they got the help they needed from a professional. It would be an honor to join CompanyName in getting people the help they need, when they need it. I'm confident that together we can do a lot of good for people.

Sincerely,

Nate Cornell
